

Lecture 1

How do you learn computational biology

Have a basic idea of the main approaches and tools.

Learn to use Google. Especially Stackoverflow.

Look at the code that others have written.

Let others look at your code.

Understand what good code looks like.

Markdown

Rich text format.

The best way to learn about Markdown is to Google “Markdown”. You will get pages like this.

subtitle

smaller subtitle

bold

italic

You can make a list: 1. item 1 2. item 2

Or not numbered: - item - another item

You can write “literal text” **like this** for a few words.

Or like this (with a colon and indentation):

for a block of text
